

The SUITMATE® Costume Dryer helps prevent water from damaging your changing or hotel rooms. Wet and dripping swimsuits can harm metal lockers by rusting; wooden lockers by delaminating; and promote mould and mildew in carpets and furniture.

With most swimmers placing their wet costumes in a sports bag, they return to the hotel room or home with their costume still soaking and possibly using the hairdryer to dry their costumes.

Remove approximately 95% of a suit's water in an 8 second cycle by using a SUITMATE spin dryer, and make the costume drip free. It is safe for all fabrics, simple to use and install, and is reliable.

As the Main UK Distributor, we also offer servicing packages, genuine spares and repair service. The SUITMATE unit has been in production for over 30 years and is supplied worldwide. Manufactured with a rigid stainless steel construction that resists the stress of vibration compared to plastic models. This makes the SUITMATE swimsuit dryer the only swimming costume dryer on the UK market you can trust. Buy the GENUINE and best SUITMATE swimming costume spinner for peace of mind.

Specification:

220 – 240v AC @ 50Hz Unit 1000W for an energy saving 4.5 Amps

Size: 381mm x 381mm x 584 mm ht

Weight 25kg. (Approximately)

Construction: Rust free stainless steel and high density polyethylene plastic

3100 rpm spin speed

Other electrical configurations available: CE Approved / KTL Approved

Safety Features:

Manual self-start and self-stop
No exposed moving parts
Built-in ground fault circuit interrupter (R.C.D.)

Operating Features:

Easy to follow instructions.
Apply hand pressure on lid to start
Removes approximately 95% of a suit's water in approx 8 seconds cycle on timer
Uses no heat, to give low running costs
Safe for all swimsuit materials
One suit per operation

Installation:

Moisture-proof electrical junction box and wall-mount bracket are provided. Water for disposal should be directed to floor drain or piped to waste water system.
