

XL Pro High Speed Hand Dryer

The XL Pro High Speed Automatic Hand Dryer has a market leading original clean and hygienic design for excellent performance in high traffic areas. Offering a slim profile from the wall and only 78db noise level, whilst drying hands in 7 to 10 seconds, makes this one of the class leading hand dryers in the UK. The cover is manufactured in grade 304 stainless steel 1.2mm thick to protect against corrosion and vandalism.

The XL Pro High Speed Automatic Hand Dryer senses the ambient air temperature and intelligently adjusts the heater power to suit, automatically saving on electricity costs. Being of automatic operation, the machine powers up when hands are placed underneath in the sensor zone and shuts down when they are removed, saving energy over push button timed machines.

The XL Pro High Speed Automatic Hand Dryer is ideal for use in restaurants, pubs, clubs, hotels, call centres, schools, colleges, universities, sports stadiums, cinemas, gyms, convention centres, super markets, shopping centres, airports, and offices.

Product Specification

Drying time: 7-10 seconds

Air Temperature 40-65°C

Ambient Humidity \leq 80%

Start Mode: IR Inductive

Power: 1800W (Including the motor)

Motor Power: 550W

RPM: 24000

Air Speed: 90m/S

Dryer Time Protection: Cut off and reset after 60 seconds of continual use

Automatic Sensing: Yes

Sensing Distance 12 \pm 3cm

Noise Level: 78db

Voltage: AC 220V-240V/110V-127V, 50HZ/60HZ

Power capacity: 1800W

Waterproof grade: IPX1

Protection Class: 1

Cover Material: 304 Stainless Steel, 1.2mm Thick

Cover Finish: Bright

Product Size: 295w x 171d x 325ht mm

Weight: 4.5kg

Installation: Wall Mounted

Certification: CE, ROHS

1-year Manufacturers Guarantee (Does not cover vandalism or poor installation/servicing/cleaning)
